

Market Update

What a bounce back it has been. When we wrote our first quarter update, the uncertainty around the coronavirus outbreak, the unprecedented closing of much of our economy, and the unknown economic impacts made it difficult to predict how quickly the market could recover. Since then, however, the stock market had its strongest quarter in over 20 years. Some highlights were:

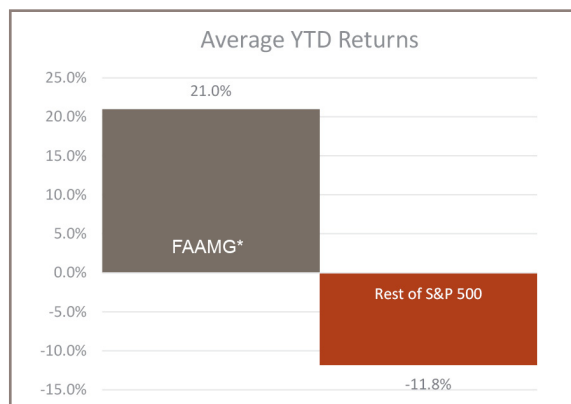

- The S&P 500® Index gained 20.5% in Q2
- Small cap stocks recovered even more than they had in Q1
- International markets recovered nearly as much, with emerging markets leading the way
- The S&P 500 was only down 3.1% this year and 7.8% from its February high at quarter end
- “Growth” stocks dramatically outperformed “Value” stocks
 - Stay-at-home growth stocks in the Technology and Communications sectors continued to lead the recovery
 - Financial and Industrial companies continued to lag
- Investors were underestimating the government stimulus, which included interest rate cuts, hundreds of billions in business loans, and even checks to individuals
- Investors also underestimated the ability for most businesses and workers to quickly adapt to a work from home environment, leaving the leisure and hospitality industries as the epicenter for layoffs and furloughed employees

Asset Category	Q2 2020	YTD
U.S. Large Cap Stocks	20.54%	-3.08%
U.S. Mid Cap Stocks	24.61%	-9.13%
U.S. Small Cap Stocks	25.42%	-12.98%
Developed International Stocks	14.88%	-11.34%
Emerging Market Stocks	18.08%	-9.78%
Intermediate Term Bonds	2.81%	5.28%
U.S. Value Stocks	14.29%	-16.26%
U.S. Growth Stocks	27.84%	9.81%

Looking Under the Hood

While the S&P 500 was only down 3.1% at the end of the quarter, its returns have been heavily skewed by just a few strong stocks. As of June 30, the 5 largest stocks in the S&P 500, including Facebook (FB), Amazon.com Inc (AMZN), Apple Inc (AAPL), Microsoft Corp (MSFT), and Alphabet’s Inc Google (GOOGL), made up 20% of the index. Those five stocks had an average gain of 21.0% this year. The other 495 stocks in the index had an average decline of 11.8%.

Portfolio Updates

You may recall that we opportunistically rebalanced many of our accounts on March 18. That turned out to be near the end of the market decline (market bottom was March 24) and on a day that the market went down nearly 10%, making it a nerve-racking day to make such a move. We moved 6-8% of the account from bonds to U.S. stocks. Since then, the S&P 500 has gained 30% versus only 4.6% for bonds, making this a positive contributor to performance (at least so far). In periods of high stress, having a process driven approach helps to fight the emotional urge to flee toward safety and can be an important factor in long-term success. While we had several other positive contributors during the quarter, the best performing fund was surprisingly the Touchstone Sands Capital Emerging Markets Growth fund, which gained 34.4% and is now up 6.77% for the year (all fund returns are found later in this report). Foreign markets have struggled to keep pace with U.S. equities, but the team at Touchstone Sands Capital has been able to identify opportunities benefiting from increased domestic consumption through large exposures in technology and consumer-related stocks in China and India, which have done well this year. The newly added Federated Kaufmann Large Cap and MFS International Diversification funds have also performed well since they were purchased in February and March respectively. We elected to add the Federated Kaufmann fund to our models with a heavier focus on long-term growth to better emphasize the disparity between the two styles. Since adding the fund in February, growth has continued to outperform value by over 20%. On the other side of the ledger, our position in the John Hancock Small Value fund detracted from relative returns due to over weights in more cyclical industries and weaker stock selection in consumer related businesses.

What now?

Now that the market has gained back nearly all of what was lost, despite record unemployment rates, increasing bankruptcy rates, declining Gross Domestic Product (GDP), and civil unrest, investor focus now will likely turn to

1. The size and timing of a second coronavirus stimulus bill
2. Timing of a vaccine, which will dictate the speed of further opening up the economy
3. Further spikes in coronavirus outbreaks and deaths
4. Likely one of the most negative and deeply divided Presidential elections cycles ever

Volatility is likely to accompany much of this, particularly since the market has priced in the assumption that we get a vaccine that allows the economy to open back up, that the government will continue to do whatever is necessary to prevent an economic collapse, and that the outcome of the election will be relatively benign either way. The recent rally provides a great opportunity to reassess your risk tolerance and willingness to take on market risk since these types of decisions are typically better made during good times rather than trying to think about them during a time of market uncertainty. We offer a variety of different allocations to help create the right mix for your situation.

*FAAMG is an abbreviation coined by Goldman Sachs for five top-performing tech stocks in the market, namely, Facebook, Amazon, Apple, Microsoft, and Alphabet’s Google. Performance shown is historical and is no guarantee of future results. Please see page 4 for Important Disclosures and Index Definitions.

The investment and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Mutual Fund and Index returns are provided by Morningstar and Zephyr StyleADVISOR.

You should consider each mutual fund's investment objectives, risks, charges and expenses carefully before investing. Each mutual fund's prospectus contains this and other important information, should be read carefully before investing or sending money, and can be obtained by contacting your Investment Executive, or by calling (800) 846-6666. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Investing in securities carries risk including the possible loss of principal.

Important Disclosures

¹The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's A, C, R, IS and R6 classes (after the voluntary waivers and/or reimbursements) will not exceed 1.08%, 1.86%, 1.47%, 0.83% and 0.77% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) January 1, 2021; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of Trustees. ²Hartford Administrative Services Company ("HASCO"), the Fund's transfer agent, has contractually agreed to waive and/or reimburse a portion of the transfer agency fee to the extent necessary to limit the transfer agency fee for Class Y as follows: 0.08%. This contractual arrangement will remain in Effect until February 28, 2021 unless the Board of Directors of The Hartford Mutual Funds, Inc. approves its earlier termination. ³Touchstone Advisors, Inc. (the "Advisor" or "Touchstone Advisors") and Touchstone Strategic Trust (the "Trust") have entered into a contractual expense limitation agreement whereby, effective June 1, 2020, Touchstone has agreed to waive a portion of its fees or reimburse certain Fund expenses (excluding dividend and interest expenses relating to short sales; interest; taxes; brokerage commissions and other transaction costs; portfolio transaction and investment related expenses, including expenses associated with the Fund's liquidity providers; other expenditures which are capitalized in accordance with U.S. generally accepted accounting principles; the cost of "Acquired Fund Fees and Expenses," if any; and other extraordinary expenses not incurred in the ordinary course of business) in order to limit annual Fund operating expenses to 1.15%, 1.90%, 0.90% and 1.14% of average daily net assets for Classes A, C, Y and Z shares, respectively. This contractual expense limitation will be effective through May 31, 2021. Please refer to the fund's prospectus for more information. ⁴Investors pay the net expense ratio of the fund.

Diversification and Asset Allocation does not ensure a profit or guarantee protection against a loss. It is important to note that short-term and trailing performance will fluctuate. We expect all of the funds at some point to experience underperformance versus their benchmarks and peer groups. However, we believe that our research process has helped us identify funds that are likely to perform well over the long term. Our decision to remove a fund is not based on short-term performance, but on in-depth analysis using our Monitoring Criteria. The mutual fund categories are determined by Davenport using a combination of Morningstar categories and a returns-based style analysis provided by Zephyr StyleADVISOR.

Any opinions expressed here are statements of judgment on this date and are subject to future change without notice. This information may contain forward looking predictions that are subject to certain risks and uncertainties which could cause actual results to differ materially from those currently anticipated or projected. The information contained herein has been compiled from sources believed to be reliable; however, there is no guarantee of its accuracy or completeness. There is no guarantee that a company will continue to pay a dividend. The investment return and principal value of an investment will fluctuate. Small and mid cap company stocks may be more volatile than stocks of larger, more established companies. The portfolios may invest in foreign securities which are subject to additional risks such as currency fluctuations, political instability, differing financial standards and the potential for illiquid markets.

Bonds are subject to market and interest risk; values expect to decline as interest rates rise. Bonds may not be suitable for all investors and you should consider specific risks such as credit risk, default risk and volatility prior to investing.

The **MSCI ACWI ex USA SMID Index** represents the performance of small-cap and mid-cap stocks in developed and emerging markets, excluding the U.S. The index is computed using the net return, which withholds applicable taxes for non-resident investors. The **MSCI Emerging Markets (MSCI EM) Index** is a capitalization-weighted index of stocks from emerging markets that only includes issues that may be traded by foreign investors. The reported returns reflect equities priced in U.S. dollars and do not include the effects of reinvested dividends. The **Russell 2500® Index** is a market cap-weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of United States-based listed equities. The **Bloomberg Barclays U.S. Corporate High Yield Index** measures the U.S. dollar-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. The **Bloomberg Barclays Intermediate Government/Credit Index** is an unmanaged index composed of debt securities with maturities from one to ten years issued or guaranteed by the U.S. Treasury, U.S. Government agencies, quasi-federal corporations and fixed rate dollar denominated SEC-registered corporate debt that are rated investment grade or higher by Moody's Investors Service and Standard and Poor's Corporation or Fitch Investor's Service, in that order. It includes investment grade, U.S. dollar-denominated, fixed-rate Treasuries, government-related and corporate securities. The **BBgBarc US Govt/Credit 1-3 Yr** measures the performance of US Treasury securities that have a maturity ranging from 1-3 years. The **Bloomberg Barclays U.S. Aggregate Bond Index** is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS (agency and non-agency). The **Bloomberg Barclays U.S. Corporate Bond Index** measures the investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate bond market. The **Bloomberg Barclays U.S. Government Index** includes U.S. dollar-denominated, fixed-rate, nominal U.S. Treasuries and U.S. agency debentures (securities issued by U.S. government owned or government sponsored entities, and debt explicitly guaranteed by the U.S. Government). The **FTSE 3-Month T-bill Index** is an unmanaged index representing monthly return equivalents of yield averages of the last 3 month Treasury Bill issues. The **FTSE Nareit All Equity REITs Index** is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.

An index is not available for direct investment; therefore its performance does not reflect the expenses, fees and taxes generally paid with the active management of an actual portfolio.

Risk Considerations: International funds invest primarily in equity securities of issuers outside the United States. International investments are subject to additional risks such as currency fluctuations, political instability, and the potential for illiquid markets. Funds that invest in foreign securities may involve greater risks, including political and economic uncertainties, as well as risk of currency fluctuations. Investments in emerging markets come with much greater risk due to political instability, domestic infrastructure problems, currency volatility and limited equity opportunities, as many large companies may still be "state-run" or private. Small and mid cap company stocks may be more volatile than stocks of larger, more established companies. Investments in bonds and other fixed income securities may fall in value if interest rates change. Generally, the prices of debt securities rise when interest rates fall, while their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes. An issuer suffering an adverse change in its financial condition could see the credit quality of its securities deteriorate, leading to greater price volatility of the security. Funds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile.

Upside Capture Ratio measures a manager's performance in up markets relative to the market (benchmark) itself over the preceding 10-year period. **Downside Capture Ratio** measures a manager's performance in down markets relative to the market (benchmark) itself over the preceding 10-year period. **Gross Expense Ratio** is the total annual operating expenses of a fund divided by its average net assets. **Net Expense Ratio** is the total annual operating expenses of a fund, less any fee waivers, divided by its average net assets. This is the expense ratio actually charged by the fund for the previous fiscal year.
