Determining the Appropriate Level of Risk*:

Building Portfolios in Line with Your Goals:

As of April 10, 2025

*The chart represents risk and return metrics. Greater risk is associated with a greater probability of higher return. Less risk is associated with a greater probability of smaller return.

Diversification and Asset Allocation do not ensure a profit or guarantee protection against a loss. Allocations may be subject to change without notice. Portfolio holdings are subject to change on a daily basis. The above portfolio represents the current FundAdvisor Conservative Income model. Actual account portfolios may vary. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original costs.

Risk Considerations: Funds that invest in foreign securities may involve greater risks, including currency fluctuations, political and economic uncertainties, and the potential for illiquid markets. Small and mid cap company stocks may be more volatile than stocks of larger, more established companies. Investments in bonds and other fixed income securities may fall in value if interest rates change. Generally, the prices of debt securities rise when interest rates fall, while their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes. An issuer suffering an adverse change in its financial condition could see the credit quality of its securities deteriorate, leading to greater price volatility of the security. Funds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile.

You should consider each fund's investment objectives, risks, charges and expenses carefully before investing. Each fund's prospectus contains this and other important information, should be read carefully before investing or sending money, and can be obtained by contacting your Financial Advisor, or by calling (800) 846-6666.

Important Disclosures:

The **Fund Expenses** are calculated by taking the aggregate weighted average expenses of the funds in each model and are reflected in fund performance. Expenses include fund management and administrative fees including advisory fees paid to the Fund's investment advisor. These expenses are in addition to the advisory fee paid to Davenport.

Definition of Firm: Davenport Asset Management ("DAM") is a separate and distinct business entity of Davenport & Company LLC. DAM manages various investment strategies where DAM is responsible for security selection.

FundAdvisor Description and Model Definitions: The Davenport FundAdvisor ("FundAdvisor") strategy is based on the long-term growth of capital through investment in one of six diversified portfolios of mutual funds, each differentiated by investment objective and risk and return characteristics. The FundAdvisor Aggressive Growth model is invested primarily in equity mutual funds with considerable positions in more volatile asset classes. The FundAdvisor Growth and the FundAdvisor U.S. Growth models are invested primarily in equity mutual funds with a majority weighting in more conservative equity asset classes. The FundAdvisor Moderate Growth model is invested in equity mutual funds and, to a lesser degree, fixed income mutual funds. The FundAdvisor Growth & Income model is invested in equity mutual funds, with considerable exposure to fixed income mutual funds. The FundAdvisor Conservative Income model is invested in fixed income mutual funds and a lesser percentage in equity mutual funds.

Annual Fees:

• 1.25% of the first \$1 million or portion thereof in market value • 1.00% of the next \$4 million in market value • 0.75% of the market value above \$5 million
In some instances, fees may be negotiated. The fee is inclusive of investment advisory services, custody of assets and execution services where applicable and is generally a percentage of assets under management.
